Audit and finance training taught me how to read sales, procurement, production, and cash-flow processes.
Working with AI agents, I shipped a live ordering, payment, delivery, scheduling, and payroll system for a real paying client.

PROJECT

oppachikin · Digital operations system for a fried-chicken shop	Independent Developer	2026.03 - Present
- Delivered a production system from 0 to 1 in 5 weeks, covering 23 pages, 19 APIs, ordering, payment, notifications, membership, and order tracking. The system is live and has received a real paid order. - Designed a delivery pricing engine: a Vercel Cron job samples Yandex courier fares every 10 minutes, using 2,592 samples to build a weekday × time-window × distance fare table with human fallback for edge cases. - Built a Telegram scheduling bot running 7x24, supporting employee self-service shift selection, work-hour tracking, and monthly payroll calculation.		

EXPERIENCE

SF Tech	Financial Analysis	2025.04 - 2025.10
- Mapped the KA project monthly close workflow from acceptance, invoicing, collection, P&L, and commercialization support, consolidating 6 core reports / ledgers into a structured process. - Scripted the data extraction, cleaning, and consolidation flow for KA project P&L reports, reducing processing time from 1 day to 2 hours. - Integrated acceptance materials, outstanding collection split, and batch invoicing templates, reducing repetitive handoffs across people, Excel, and email.		
Wuxian Jinzhi	Financial Analyst	2024.07 - 2024.10
- Financial data automation and reconciliation: Used Excel VBA + Power Query to clean hundreds of iOS / Google / PayPal revenue reports, standardize data formats, and build reconciliation models, improving efficiency by 30%. - Budget planning and execution monitoring: Coordinated monthly cash budgets across the company, working with 10+ departments on data collection and compliance review; built actual-vs-budget models to flag deviations within ≤3%. - Management reporting system: Designed standardized monthly operating report templates and visualized key metrics such as revenue, cost structure, and cash flow to support management decisions.		
KPMG Shenzhen	Assistant Audit Manager	2021.07 - 2024.01
- Industry and financial analysis: Used industry research, comparable-company data, and three financial statements to break down target companies' business models, revenue-recognition logic, and profitability fluctuations, supporting audit risk assessment. - Internal-control process diagnosis: Conducted interviews and walkthrough tests for core processes such as revenue, procurement, and expense approval; mapped sales / procurement / production / treasury control flows, covering 20+ key controls and identifying 15 control deficiencies. - Audit delivery and due diligence: Completed PRC / HKFRS consolidation across 30+ subsidiaries, reviewed 100+ material sales / procurement contracts, and optimized working-paper templates to shorten delivery cycles by 25%.		

EDUCATION

Southwestern University of Finance and Economics	M.A. in Public Finance	2018.09 - 2021.06
Tianjin Normal University	B.A. in Investment	2014.09 - 2018.06
